

Warehouse optimisation contract from council

Hertfordshire County Council has awarded (through a competitive tender process) a contract to **Gideon Hillman Consulting** for the provision of Warehouse Design Consultancy Services to optimise a

Gideon Hillman Consulting
Supply Chain and Logistics Specialists

current warehouse facility in Welwyn Garden City.

The 80,000ft² site is currently used for the supply of a wide range of products and general supplies to the local authority and schools. The objective was to increase the throughput of the facility to accommodate a greater number of product lines. This required greater efficiency in the use of existing racking and logistics of picking stock to order.

The warehousing specialists at Gideon Hillman Consulting reviewed in detail the existing operation and developed an optimised layout and picking strategy that allows for the management and distribution of the increased product range and throughput.
